

## The Human Body Quiz 1 Outline

My Quiz will be on \_\_\_\_\_ **October 29th** \_\_\_\_\_

This first quiz will be on **the digestive system, the respiratory system and the circulatory system**. For this quiz you will need to be able to do:

### 1) Label the **digestive system**

- Mouth
- Esophagus
- Stomach
- Small Intestine
- Large Intestine
- Anus

- Know the order of the digestive system
- Know the function of each organ in the digestive system and what happens in each organ as your food is digested. ( page 89)

### 2) Know the main organs of the **respiratory system**

- Nose
- Mouth
- Trachea
- Lungs
- Diaphragm

- Know how the respiratory system works (page 93, 94, 95)

### 3) Know the main parts of the **circulatory system** (page 102 - 106)

- Heart
- Blood vessels
  - Arteries
  - Veins
  - Capillaries
- Blood
  - Blood cells (red, white, platelets)
  - Plasma

- Know how blood travels through your body

## Human Body Study Guide

<u>Date</u>	<u>Task</u>	<u>Complete?</u>
	Read through the information on the digestive system. <a href="#">Page 88 and 89</a>	
	Practice <a href="#">labelling the digestive system</a> . (Can I do it independently and confidently? If not, it is not considered complete yet) Here's another place to <a href="#">practice online</a> .	
	Practice <a href="#">filling out this sheet</a> to make sure you know what happens in each organ of the digestive system.	
	Read through the information on the respiratory system. <a href="#">Page 92 - 95</a>	
	Use your model lung to explain to a family member how the respiratory system works (important vocabulary: inhale, oxygen, diaphragm, contracts, carbon dioxide, exhale)	
	Read through the information for the circulatory system. <a href="#">Page 101 - 106</a>	
	Practice explaining <a href="#">how blood moves through your body</a> . What is red? What is blue?	
	Use <a href="#">this sheet to help review</a> the various parts of the circulatory system.	
	Do one final review of all components of the quiz.
